What Hallux by FIDELIO does for you:

1. Invisible MAGIC-STRETCH® Function - Only the bunion area is stretchable, not the entire forefoot, thereby providing a perfect fit with excellent support.
2. Hallux Last Fit, Width H or J - These lasts are masterpieces! It is incredible how well this shoe absorbs and hides the bunion.
3. The ball pivot is positioned correctly - Golden Cut - broken last!
4. Soft Upper Leather - Lambskin, suede Goatskin, Calfskin, faux Crocodile skin.
5. Soft Leather Lining - Forefoot is also leather lined, stretch lining only in the bunion area.
6. Softly Padded Inner Lining - Breathable through modern macro-point bonding.
7. Light-Weight, PU, Air-Cushioned Sole - Enables dynamic rolling of the foot and provides stability at the sides. A FIDELIO® loafer in size 4 ½ weighs only 259 grams!
8. Strobel Construction - Extremely light and flexible.
9. Full Natural Cork Insole - A World First: FIDELIO® introduces the first soft natural cork insole! Anatomically formed, breathable, regulates foot humidity.
10. Leather Insole - Just as the upper and the lining are made of leather, so is the insole finished in leather.
11. Slim Heel - Extra long heel counter for improved hold.

HALLUX - FABIA

Width F½

The FABIA has been a success from the outset! The sandal provides an excellent fit for many foot types and includes widths from medium to wide. The Hallux is absorbed wonderfully by the stretch insert and is perfectly "hidden."

- Heel height 32 mm, gradient 21 mm.
- Soft, padded stretch insert.
- Toe portion of leather insert matches colour of leather upper.
- PERFECT fit due to deep-cupped heel.
- 100% natural cork insole, ECO-certified.
- Soft padding at forefoot.
- Air-cushioned sole + strobel finish: Soft tread outsole with excellent grip.
- Ideal for full orthotics.

OUR LASTS ARE DESIGNED TO FIT

Customers trying our sandals on for the first time praise their comfort. The insole is made from feather-light natural cork covered with a layer of the best calf leather. It perfectly supports your anatomy and properly supports the foot. The deep-cupped heel correctly positions the foot while providing additional stability. It is these innovations that correctly distribute weight and makes the sandal so comfortable.
