

# TRAMPOLINES

## INSOLE FEATURES & BENEFITS

Trampolines Active Sport Insoles are for all walks of life.

1. Our insoles are cushioned and springy while providing support and ease of walking with every step. Other insoles can be too soft or hard as a rock.
2. The insoles have no break-in period, so enjoyment starts with the very first step.
3. The patented Carbanite® Foundation aids in the proper alignment and stability of your body, working in the prevention of pronation problems that can cause ankle injuries, plantar fasciitis, knee, hip and back pain.
4. Our patented Carbanite® Foundation consists of two catamaran shaped pods that parallel the heel cup creating a trampoline effect absorbing shock and returning energy with every step.
5. Trampolines have built in metatarsal support which acts to help separate the small bones of the foot, helping to relieve pressure on sensitive nerves.
6. The insoles include antimicrobial protection against bacteria that can cause odor and disease.
7. The green Anti-Blister top cover controls foot slide, helping to prevent irritation and blisters while keeping feet cooler and drier.
8. Trampolines arch supporting insoles put a spring in every step helping to reduce fatigue. This will extend your ability to walk and allow you to stand for longer periods.
9. Our insoles are made with the finest materials to give you long lasting comfortable service.
10. Trampolines are the ultimate arch support insoles putting a bounce back in every step, giving you the feeling of walking on air.
